DO YOU HAVE A CHILD BETWEEN THE AGES OF 9 AND 12 WHO STRUGGLES WITH BEING PHYSICALLY ACTIVE?

If so, you could be eligible for an interactive gamebike in your home for 6 weeks!

Families are invited to participate in a study entitled “Exercise games and physical activity”. The study is being conducted by Dr. Nicholas Graham from the School of Computing and Dr. Amy Latimer-Cheung from the School of Kinesiology and Health Studies at Queen’s University.

Interactive exercise equipment is a new and exciting approach to increasing physical activity. We are currently seeking children to participate in a 6-week study that examines how well interactive video motivate children to be physically active.

Participating families will be provided with a gamebike and exercise video games for 6 weeks!
